

## *Service capitalized*

As part of numerous projects, Gumpinger Software takes part as IT-service provider and worked at the development of own modules.

### **Initial situation**

The OÖGKK refers since years the own IT-know-how of different projects. Therefor Gumpinger Software is used for the solution of specific partial problems.

### **Implementation**

The following specific IT-know-how we were able to use:

- Programming services in Java
- Smart card and citizen card signatures
- PDF-generation
- Web-parts: HTML, CSS, JavaScript, WAI compliant website design (accessibility)

### **Result**

In these projects we contribute:

- “ABS”: Within the scope of this project a software solution was developed, with it the prescribing practices of panel doctors and hospitals can be compared with each other. In this case, it can be found, how far the cost-consciousness are available of a doctor.
- “ELDA”: ELDA is the electronic data exchange with the Austrian social insurance. Employer and contract partner use ELDA since 1995 for the transmission of their messages to the social security and to the financial management.
- “Beitragsgruppenrechner Online”: The social security law is very unclear and for many impenetrable. Moreover, there are constantly new changings, loop-in regulations, etc. In order to give assistance to the employer in finding the social security record, the development of an online-tool has been commissioned.

### **Auftraggeber**

**Company** Oberösterreichische  
Gebietskrankenkasse

**Headquarters** Linz, OÖ

**Website** [www.ooegkk.at](http://www.ooegkk.at)

**Project name** Dienstleistungen

**Implementation** 2006-2010

*„Gumpinger Software is an insider tip, when it is about special know-how and innovative solutions!“*

Dr. Gerhard Mayr, IT Direktor OÖGKK.
